

Creative Coding Steps: Math Problem

1. Click the green start flag to start the sample project.
2. Start your own project by dragging the the purple effects block to the Code Editor.

3. Add a WHEN SPRITE CLICKED block to make it interactive.
4. Experiment with different visual effects and values.
5. Add the same code for the other sprites.
6. To change the math questions, click the Annie sprite.
7. Type a new math problem in a SAY block.
8. Click the Add button on the right to add more sprites to your math problem.
9. Try more effects, such as:
 - a. Change sprite size
 - b. Change text
 - c. Change color
