## NGSS

### Science and Engineering Practices: 3-5

- **Constructing Explanations**
  - Construct an explanation of observed relationships (e.g., the distribution of plants in the backyard).
- **Obtaining, Evaluating, and Communicating Information**
  - Obtain and combine information from books and other reliable media to explain phenomena.
  - Read and comprehend grade-appropriate complex texts and/or other reliable media to summarize and obtain scientific and technical ideas and describe how they are supported by evidence.
  - Communicate scientific and/or technical information orally and/or in written formats, including various forms of media and may include tables, diagrams, and charts.

### Disciplinary Core Ideas

ESS1.B: Earth and the Solar System      The orbits of Earth around the sun and of the moon around Earth, together with the rotation of Earth about an axis between its North and South poles, cause observable patterns. These include day and night; daily changes in the length and direction of shadows; and different positions of the sun, moon, and stars at different times of the day, month, and year.

### Crosscutting Concepts: 3-5

- **Patterns**
  - Similarities and differences in patterns can be used to sort, classify, communicate and analyze simple rates of change for natural phenomena and designed products.
  - Patterns of change can be used to make predictions.
  - Patterns can be used as evidence to support an explanation.
- **Cause and Effect**
  - Events that occur together with regularity might or might not be a cause and effect relationship.
